

Emmanuel Adeyemo

SENIOR PRODUCT MANAGER

Calgary, AB | +1 368 889 4944 | em.adeyemo@gmail.com | [LinkedIn](#) | [Portfolio](#)

Product Profile

Product Manager with 8+ years of experience building and scaling high-volume, transaction-driven platforms across fintech and AI-powered systems. Proven track record of owning end-to-end product strategy and execution for systems operating at millions of transactions monthly.

Expert in designing payment-adjacent workflows, financial integrations, and high-trust user experiences that balance speed, reliability, and fraud prevention. Strong technical fluency with APIs, distributed systems, and data-driven decision making, with a focus on unlocking growth through seamless customer experiences.

Key Product Impact

- Scaled platforms supporting **10M+ monthly** transactions and verifications globally
- Reduced onboarding and transaction friction by **50%**, improving activation and conversion
- Increased platform revenue by **400%** through productization of core financial and AI capabilities
- Improved retention by **35%** through workflow and experience optimization
- Reduced reconciliation discrepancies by **30%** through system-level improvements

Core Product Capabilities

Payments & Transaction Systems | Recurring & Authenticated Workflows | Product Strategy & Roadmaps | API & Platform Products | Financial Integrations (Plaid, Flinks) | Data-Driven Product Decisions | Experimentation & Metrics | Customer Experience Optimization | Cross-Functional Leadership | Agile Delivery | Stakeholder Management | Global Product Scaling | APIs & Integrations | SQL (Working Knowledge) | Product Analytics (Mixpanel, Amplitude) | Experimentation & Funnel Analysis | Jira, Confluence | Data-Driven Decision Making

Product Experience

Product Lead – [Finsynq](#) (Calgary) | 2025–Present

Building an AI-powered fintech platform focused on financial visibility and transaction insights.

- Led end-to-end product strategy, defining roadmap for financial data aggregation, insights, and user activation
- Integrated Plaid and Flinks APIs to enable secure bank connectivity and real-time financial data access
- Designed high-trust onboarding and financial workflows, improving user activation and reducing drop-off
- Built systems around authenticated and repeat financial interactions, ensuring reliability and user confidence
- Conducted deep user research to understand trust barriers in financial data sharing and optimize conversion funnels
- Defined and tracked key metrics including activation, engagement, and retention to guide product decisions

Product Manager – [Prompty](#) (Calgary) | 2024–2025

Delivered SaaS features supporting real-time engagement and networking.

- Built API-driven features enabling real-time interactions and event-based engagement tracking
- Instrumented product features with analytics to track usage patterns and guide prioritization
- Improved user engagement and participation through iterative product improvements
- Designed scalable backend and frontend workflows supporting high-frequency user interactions

Product Manager – [Seamfix](#) (London) | 2022–2024

Led development of enterprise identity verification and transaction systems used across global financial services.

- Owned product strategy and execution for transaction-heavy identity and verification workflows at scale
- Designed systems balancing automation, fraud detection, and human review, improving accuracy and speed
- Built scalable APIs enabling integration with financial institutions and government databases
- Defined system trade-offs across latency, accuracy, and operational efficiency in high-volume environments
- Reduced onboarding friction by 50%, improving conversion and operational throughput
- Increased revenue by 400% by transforming core capabilities into scalable, monetizable products

Product Owner / Product Manager – Seamfix (Nigeria) | 2020–2022

- Translated regulatory and compliance requirements into scalable fintech product features
- Built identity verification and transaction monitoring systems used by 4M+ users globally
- Digitized manual compliance workflows into automated, AI-assisted systems
- Partnered with engineering teams to deliver secure, high-reliability platforms

Leadership

Director of Strategic Relations – [Product Calgary](#) (2025–Present)

- Lead partnerships and sponsorship initiatives supporting the Calgary product ecosystem
- Collaborate with industry leaders to drive community engagement and growth

AI-Driven Product Development

- Experienced in bridging AI model capabilities with intuitive product experiences that drive adoption
- Use LLMs and AI tools to accelerate product discovery, prototyping, and workflow automation
- Strong understanding of applying AI within real-world operational workflows

Education

University of Alberta – Product Management Certificate

University of Ibadan – Bachelor of Science
